## About the Placement:

### Detailed Placement Description

We are Victory Gardens for Peace, a project of Ecology Action. We are a research, education and demonstration site for the GROW BIOINTENSIVE Method of Agriculture, located at the Stanford Inn Eco-Resort in the town of Mendocino. We run about 1/4 acre in biointensive vegetable production with a special emphasis on sustainability. Our training site has hosted interns from many country and we select participants who demonstrate a strong desire to teach GB in the community. We develop complete diet designs which microscale the agricultural footprint of the human diet and significantly reduce resource consumption while building soils. Our techniques have been used in over 150 countries worldwide and in many soils and climates. We have a seedbank with over 1,000 accessions of locally grown, organic seeds which we make available for free to our community. We emphasize outreach, education and celebration in the shift towards a more peaceful and sustainable future. We have developed the Garden Friendly Community Resolution which is a tool to help communities develop community-based food efforts with a special emphasis on sustainability. Our GardenCorps program trains leaders to work in teams to develop community-based food projects. We offer a special 8-month internship which trains students in basic GB techniques, Sustainable Diet Design, Community Food Systems, Project Development and GB Teacher Certification. Our ideal internship participant is eager to learn this system and has a clear vision for the project they wish to create and a strong

drive to work with others to help their communities in sustainable, GB food production.
