About the Placement:

Detailed Placement Description

We are a unique organization that brings together all members of the food community, from farmers to eaters under a single multi-stakeholder cooperative where all members can participate and have a voice. We grow vegetables, berries, flowers, honey, and poultry. Our commercial kitchen produces a full array of prepared foods and our on-farm grocery store carries a complete line of farm-fresh goods. We also conduct a variety of agritourism and educational events such as farm dinners, farm camps, brunches, cooking classes, etc. There are 20+ people working at the cooperative full time and we govern ourselves using Dynamic Governance. There are generally two interns in the summer.

Primary Production :

Vegetables, Herbs, Flowers, Berries, Poultry, Bees/Honey

About the Internship:

Availability:

Full for the Season

Training Hours:

40

Training Expectations :

40 hour work week which will include hands-on work on the farm plus on-site and off-site educational opportunities
